# Pest Control Services

## Bird Proofing and control

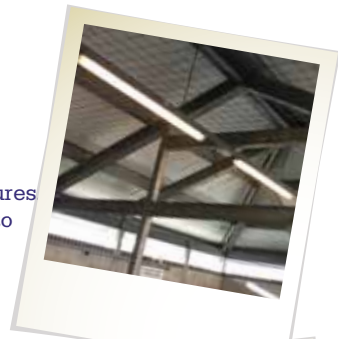

Unbugged provides professional bird proofing and control measures to domestic and commercial customers all across the Northwest. We can solve all bird problems from a single persistent pigeon to a flock of gulls. All the team are qualified to work at height and are IPAF trained, so are familiar with a wide range of access equipment solutions.

Birds cause nuisance and their guano is both unsightly and a slip hazard, as well as spreading pathogens such as Ornithosis, Salmonella and E-Coli. Large birds such as gulls can be very noisy and also aggressive, particularly when they have young.

We have the skills and capability to tackle all kinds of bird issues including pigeon spiking and netting, starling deterrents, and egg replacement programmes to disrupt gull breeding.

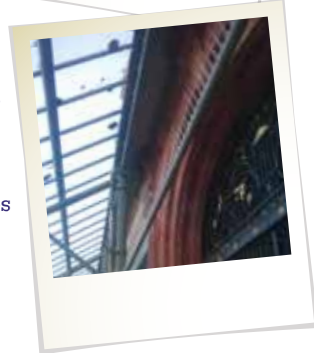

## Netting and Spiking

Efficient physical proofing methods that provide a cost effective means of keeping birds off your important structures. We have carried out many jobs, from domestic properties to large industrial units. We also use a gel deterrent which is very effective in the right situation and is ideal for visually sensitive buildings, such as listed monuments

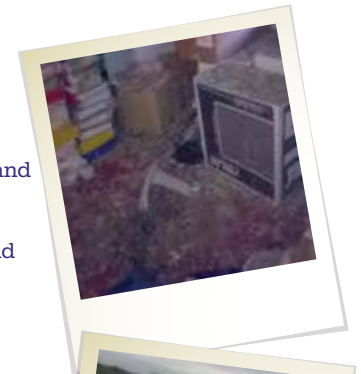

## Gull Egg Replacement

This is an excellent method of reducing gull numbers without lethal control measures being needed. When eggs are laid they are replaced with plastic eggs that the birds will still sit on but obviously they never hatch. This not only gradually reduces the number of chicks being born, but also discourages second broods and will, over time, move the birds off what they see as a poor nesting site. We have several large contracts ongoing which are proving very successful.

## Guano Clearance

We provide a removal and disposal service for bird guano and associated waste in infested premises. All guano will be removed after being treated with a biocide, and properly disposed of. The cleaned property will then be sanitised and treated with an insecticide if required, making it safe to enter or work in.

## Solar Panel proofing

More and more people are having solar panels fitted to their homes and workplaces, and pigeons have learned that they are an excellent place to nest. We can provide discreet and effective proofing that will keep birds out, without interfering with the operation of solar installations.

These are just a few examples of the wide range of bird work that we undertake, contact us with all your bird needs.
